Get cohesive protection against Advanced Persistent Threats (APTs), known and unknown threats, Living-off-the-Land (LOTL) and more.

Instantly uplift security with Australian Defence-ready Incident Response Capabilities

Full coverage Threat Detection, Investigation and Response (TDIR) with on-demand IR via Red Piranha's Defence Ready 24x7x365 MDR service.

Regular cadence sessions to maintain and improve operational security.

World Leading Cyber Threat Intelligence allows contextualisation for actionable protection, detection, and response.

Reduce the implementation time and TCO with our Integrated Technology Platform.

On-demand Digital Forensics and proactive threat hunting.

Continuous improvement of SOC processes

24x7 SOC
Our expert SecOps engineers available for continuous monitoring of your networks and systems for security threats, incident response and mitigating any identified threats.

Predictive Protection
Our predictive and automated approach to security with Automated Threat Intelligence provides increased threat prevention. Monitor and analyse activity across an entire network.

Incident response
Post-incident reports, and audit trails from our highly qualified team.

SIEM / Log management
Event Correlation, Log Management and 18+ months extended storage, for better incident management and peace of mind to meet compliance and regulatory requirements.

Threat Detection, Investigation and Response
Best-in-class TDIR to quickly and efficiently identify, assess and respond to threats. Crystal Eye detects abnormal system activity & vulnerability across your IT/OT environment, giving critical protection against APTs, unknown threats & risks associated with LOTL attacks.

Vulnerability Assessment
Perform Vulnerability scans on Local Networks, Containers/Hosts and Cloud Infrastructure. Receive curated reports highlighting the key areas of concern.

Crystal Eye XDR platform with Managed, Detection and Response (MDR) via Crystal Eye SOC (CESOC) offers high-fidelity threat detection, investigation and mitigative response with high verbosity and human interpretable reporting aligned to business-focused risks.

Crystal Eye Network detection and response (NDR) employs a combination of machine learning (ML), advanced analytics and rule-based matching to detect anomalous and suspicious activities on enterprise networks.

Protect business operations with a powerful SOAR platform and integrated technology stack allowing rapid proactive response.

24x7x365 protection for your organisation.

Meet your compliance challenges.
