

RED PIRANHA

UNIFIED CYBERSECURITY SOLUTIONS

Red Piranha
unified threat management

Stay Ahead of Cyber Threats with Red Piranha's Unified Approach

Who We Are

Founded in 2015, Red Piranha is a pioneer in Australian cybersecurity innovation, delivering world-class solutions to protect businesses from evolving cyber threats. Our globally recognised Crystal Eye platform ensures comprehensive threat management and compliance, backed by ISO/IEC 27001 certification and partnerships with Team Defence Australia and the Cyber Threat Alliance.

Why Choose Red Piranha?

The Problem: Fragmented Security is a Risk

- 68% of cyber breaches occur due to fragmented security tools.
- Standalone security solutions generate false alerts, overload teams, and create security blind spots.
- Advanced cyber threats, including EDR bypass techniques, LOTL attacks, and covert C2C communications, make traditional security tools ineffective.

The Solution: A Unified Defence Grade Strategy

Red Piranha eliminates security gaps with a fully integrated DAS-TDIR-NDR-SOC ecosystem, ensuring real-time threat detection, response, and management for complete end-to-end cybersecurity.

Red Piranha's Unified Cybersecurity Framework

DAS – Declarative Access Security

- Zero-trust access control with centralized policy enforcement.
- Microservices & multi-cloud security, ensuring seamless asset management.
- 'Allow on Need' access—ensuring only the right users access critical resources.

TDIR – Threat Detection & Incident Response

- 24/7 security monitoring & incident management.
- Human-machine collaboration for rapid response.
- Automated threat containment & forensic logging for real-time visibility.

NDR – Network Detection & Response

- Human-Machine Learning and behavioural analytics & anomaly detection.
- Multi-dimensional security insights & advanced network visibility.
- Automated blocking of malicious activity and real-time cyber threat intelligence.

SOC – 24/7 Security Operations Centre

- Continuous security monitoring and rapid threat mitigation.
- Real-time escalation and forensic event correlation.
- Compliance assurance with regulatory frameworks and policies.

Why Unified Cybersecurity Matters?

- Proactive threat defence: Detect and respond to cyber threats before they escalate.
- Operational efficiency: Integrated security reduces complexity and lowers costs.
- Compliance & risk management: Maintain regulatory compliance effortlessly.
- Cost-effective security: Reduced overhead with a single, unified security platform.
- Enhanced visibility: Real-time dashboards provide a holistic view of your security posture.

Red Piranha in Action

With Crystal Eye and unified security solutions, Red Piranha protects businesses across industries. Our Human-Machine driven threat intelligence, policy-driven access control, and automated response mechanisms ensure the highest level of cybersecurity.

Take Control of Your Cybersecurity Today

Contact Red Piranha to learn how our unified solutions can protect your organization from evolving cyber threats.
